Chicago, IL 60604

Re: Applicable, Relevant and  
Appropriate Regulations,  
American Chemical Services  
Site

Dear Mr. Adamkus:

In response to your request for applicable, relevant and appropriate regulations (ARARs) for the American Chemical Services site in Griffith, the staff of IDEM have reviewed the alternative Array Document for the American Chemical Services site. I am enclosing the evaluation and comments on the ARARs received from IDEM's Offices of Air Management, Water Management, and Solid and Hazardous Waste Management along with comments solicited from the Indiana Department of Natural Resources.

The reviews centered around the tables provided in the document, which listed potential ARARs. Many of the comments are presented as amendments to those tables.

The evaluations provided are general in nature and are designed to provide the basic framework from which a recommended alternative can be developed. Once a suitable alternative has been selected, the site and remedy specific ARARs will be provided to insure that all regulatory requirements are met during the remedial design phase. Detailed information such as emissions limitations or discharge limits cannot be provided without specific engineering design details.

We appreciate your attention to these Indiana requirements. If you have any questions, please do not hesitate to call me.

Sincerely,

Kathy Prosser  
Commissioner
